back side. Appears to me that it may need replacing or the contact area needs cleaning. It isn't a big deal to pull the cluster. Go to HomeDepot and get yourself two of the free metal paint can openers. Remove the speedo cable from its clip under the pedals to gain some slack. Move your steering wheel all the way out. The cluster is a press fit. Place the can openers in the approx 10 - 11 o'clock position on the cluster and work it forward.

Good Luck,
